Component: client Vs Server

HINDI / URDU

What is Client Component

- Render on the Client Side
- UI Related code in this component
- ‘use client’ directive is used to make these components

What is Server Component

- Render (Execution) on the Server Side
- Closer to Backend
- Backend Logic in this component
- By Default, All Components are Server Components

Client Component Examples:

- Event Listeners, UI Code
- Browser APIs (setTimeout ...)
- Hooks: useState, useEffect,
useReducer...

Server Component Examples:

- Fetch Data, Backend Code
- Sensitive Information
- Large Dependencies
